

**PLASTIC CONNECTORS  
and ACCESSORIES**

EBAD supplies plastic connectors such as bunch blocks, raptor combo connector for a quick accurate connection. We also offer the M81 firing device for initiating shock tube and safety use.

**APPLICATION:**

The use of plastic connectors provides a quick and reliable connection from the detonator to the charge. These connectors remove soldier adaptation using tape, clips, rope, and other carried items.

- Military demolition
- Minefield clearing
- Obstacle breaching
- Range clearance
- Explosive ordnance disposal
- Explosive testing

**M81 FIRING DEVICE APPLICATION:**

The M81 firing device is a mechanical safe and arm application used to initiate shock tube or safety fuse. The device contains an in-line primer for reliable initiation.

- The M81 can be field attached on to shock tube/fuse or factory installed
- Ability to reset
- The assembly is waterproof up to 20 m

**OPERATION:**

The plastic connectors function as a quick, reliable interconnect between explosive devices and assemblies. When the shock tubes initiated, the accessories become nonhazardous inert material.

**PLASTIC CONNECTORS AND ACCESSORIES TYPES:**

	<b>M81</b> — Connected to shock tube or safety fuse for reliable initiation utilizing two mechanical safe and arm methods.
	<b>Raptor Combo Connector</b> — Also known as Raptor Clip, provides a solid connection between blasting caps and detonation cord for either a single or dual initiation system. Raptor Combo Clips replace less reliable and more time-consuming methods of attaching the initiation system to the charge. This is the same clip used on EBAD's IFD II.
	<b>Bunch Blocks</b> — Connects detonators to detonating cord or shock tube. Designed to hold the detonator in position at the crimp and second door to hold detonating cord or up to 5 lines of shock tube. The plastic connector can be reopened without damage. Bunch blocks are a factory-installed or field-installed option.
	<b>Detonating Cord Connectors ("Red Devils")</b> — Connectors for easy 90° connection of detonating cords. Connectors are a field-installed accessory option made of plastic.
